

# “GDP POSITIVE INTERNET 2.0”

together in Africa we have the opportunity  
to create an Internet 2.0 based on an upgraded set of values.

# MOST COUNTRIES DO NOT HAVE THEIR OWN INTERNET.

Internet sea cables are the mode of transportation for data from one location to another. With most large data centers being located in a handful of countries, nations are losing numerous benefits.

## INTERNET 1.0 HAS LIMITS

With large companies now having access to the data of hundreds of millions of African citizens, they now hold the power to do as they please for profit.

### LOSS OF MONEY

Most of the time your citizen pays for a service online, that money leaves the country. For a larger country Billions are lost annually to large corporations who do not benefit your economy at all.

### LOSS OF DATA

Citizens unknowingly give up their private data and details to large corporations and are later manipulated by ads and other negatively impactful tactics for profit.

### LOSS OF SOVEREIGNTY

As more and more of your data leave its borders, these large corporations become more and more powerful, often surpassing the power of the local governing bodies.

### LOSS OF INFLUENCE

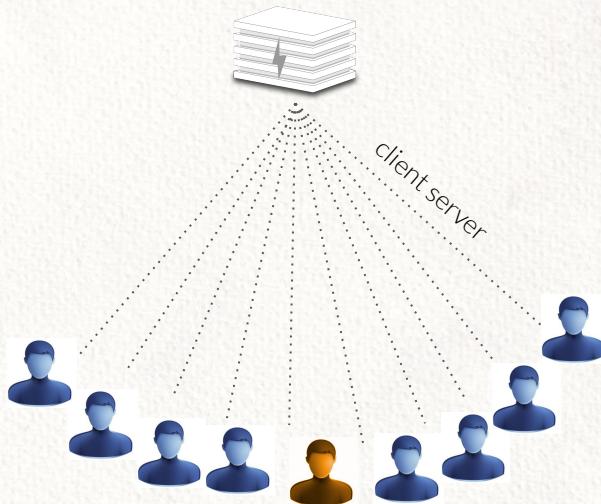

Numerous scenarios have now taken place where outside corporations dictate and influence the minds and actions of citizens of another country.

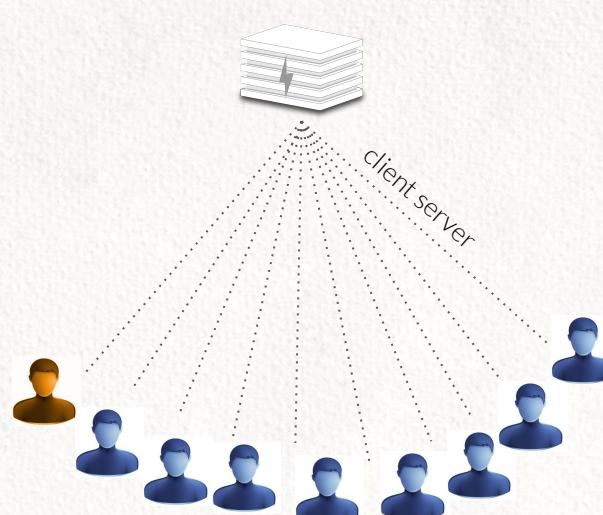

Massive datacenters and server farms  
Interconnected by high speed fiber links  
Owned by few organizations in the world

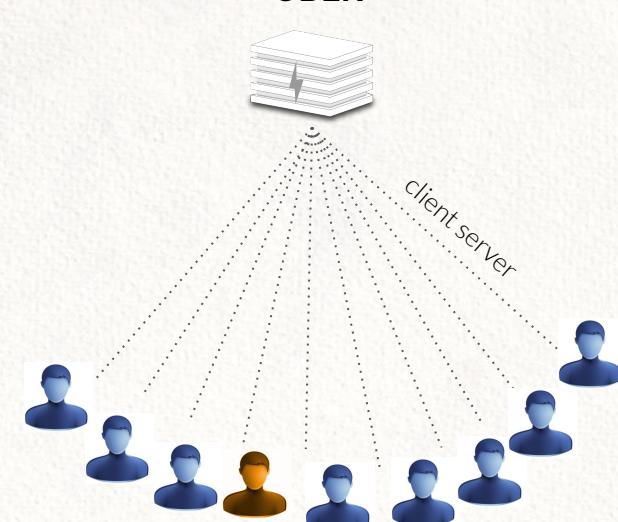

FACEBOOK

GOOGLE

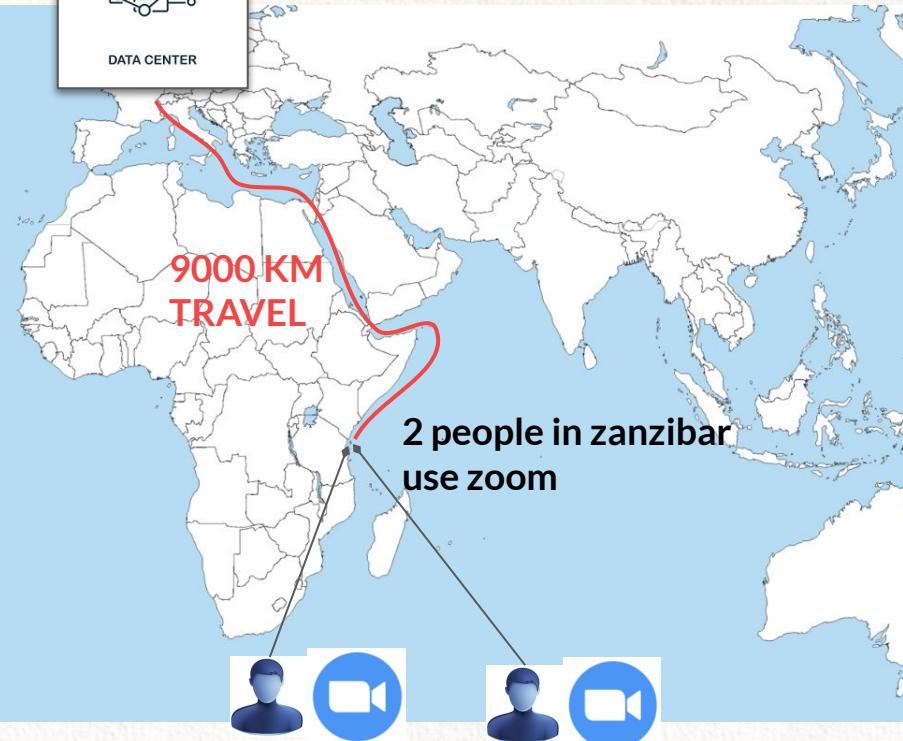

UBER

YOU EXIST 100 TIMES AND BECAME A PRODUCT, SUPER INEFFICIENT

All video data is send to datacenter in Europe, Using  
expensive fibre, wasting performance and world resources.  
Video data gets aggregated there and send back..

# THERE NEEDS TO BE A BETTER WAY

We need upto 10x less bandwidth and security will be much higher. This goes for all usecases, not just video conference.

# LET'S GO BACK 30 YEARS AGO

The internet as hope for humanity.

- Unlimited Potential
- Connect Everyone Globally
- Fully peer2peer
- No-one was afraid about security.

# BUT NOW MORE THAN EVER WE NEED A NEW INTERNET

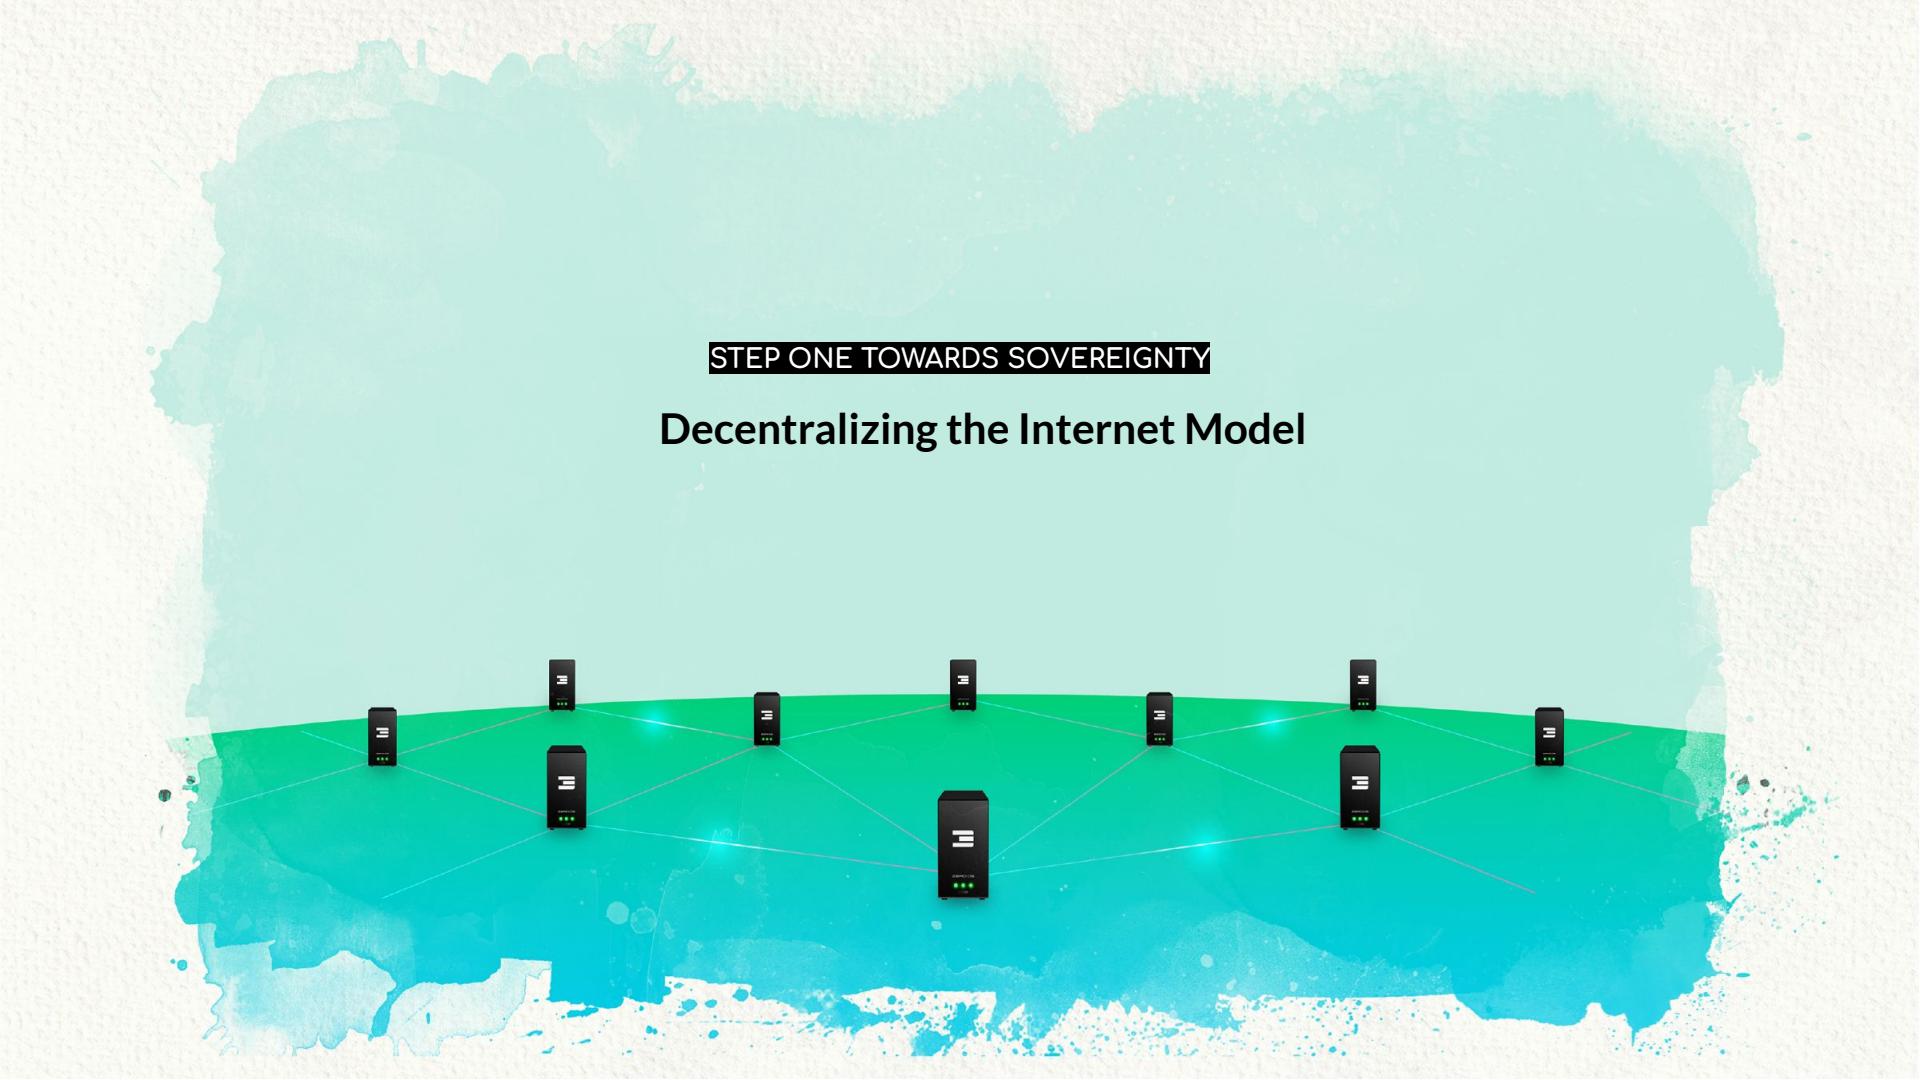

WITH BETTER FOUNDATIONAL RULES.

- Authenticity.
- Planet First.
- People First.

**WE NEED CHANGE:**

- We don't need yet another painkiller, we need to rethink the root cause of our issues.
- We don't need a face lift, we need a faith lift, change can happen and fast. It's not too late.
- We don't need another global leader to save us all, change starts from within.

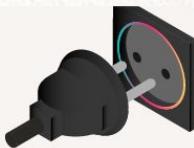

**STEP ONE TOWARDS SOVEREIGNTY**

## Decentralizing the Internet Model

# THE SIMPLEST WAY TO GET INVOLVED

## 1 PLUG IN NODE

All you need to get started  
is electricity, a network  
connection, and a 3Node.

## 2 OFFER CAPACITY

Provide peer-to-peer  
storage and compute  
capacity to host  
humanity's edge  
workloads.

## 3 EARN INCOME

Earn in the most valuable  
and rapidly growing  
economy: the Internet  
and cloud.

NUCLEAR ENERGY

SOLAR ENERGY

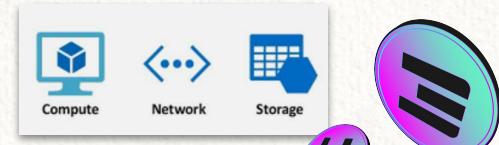

1 KWATT/H

CENTRALIZED  
DATA CENTER

DECENTRALIZED  
DATA CENTER

1 CHI or TFT  
INTERNET ENERGY TOKEN

VALUABLE ASSET

# “INTERNET 2.0”

## VALUES FIRST

---

### AUTHENTICITY

authenticity of all  
information and members

### PEOPLE FIRST

value as created  
for our communities

### PLANET FIRST

value as created  
for our planet

the ranking of your information in a search result  
is based on above values, not on how much money you paid.

# YOUR DIGITAL TWIN

---

YOUR IDENTITY  
YOUR DIGITAL CAPABILITIES  
YOUR DATA

Each experience works with your identity,  
capabilities and data

# THE CAPABILITIES OF THE FREEFLOW TWIN

---

## COMMUNICATE

Chat with your friends, hold meetings and have video conferencing

## CREATE

Create videos, documents or anything else you require for your daily needs

## SHARE

Send your data and files to anyone of your choice directly without central servers

## DISCOVER

Find and browse any information without being tracked or logged

## DEVELOP & EXPAND

Develop more tools and/or decentralized applications for the ThreeFold Grid

## TRANSACT

Transact or manage your assets using the wallet features available with the Twin

# FREEFLOW EXPERIENCES ARE CHANGING THE WORLD

---

## FREE FLOWING EDUCATION

All citizens can now acquire information and learn skills

## FREE FLOWING EMPOWERMENT

All citizens can now get the opportunity to participate in the digital economy

## FREE FLOWING COLLABORATION

All citizens can now work together to achieve goals and growth

# BECOME THE CENTER OF YOUR DIGITAL LIFE

Since your FreeFlow Twin is the only destination where your data can be accessed and seen, you essentially become the application.

DIRECT COMMUNICATION  
**TWIN TO TWIN**

FreeFlow Twins don't require access to central servers and can directly communicate and collaborate with each other without worrying about privacy, security or data interference.

# OURVERSE

A METAVERSE EXPERIENCE

# OUR QUEST FOR AUTHENTICITY

---

-  
Information needs to be valuable and authentic  
Community and peer reviewed  
We need to be ourselves, no reason to fake it.

-

We need the most authentic extension and representation of our physical world.

-

**Blockchain Based  
Proof of Authenticity**

OURVERSE WEB

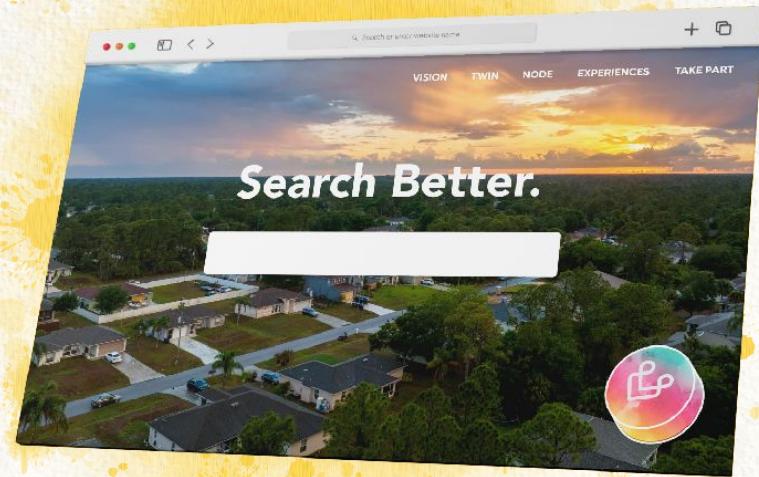

# CREATE A NEW INTERNET

---

Publish any information, web, multi-media, knowledge base, commercial website ...

All this information can be found and accessed through the OurVerse Search tool in all neutrality and authenticity

Thanks to the ThreeFold grid, all this data is safe and sovereign and cannot be abused

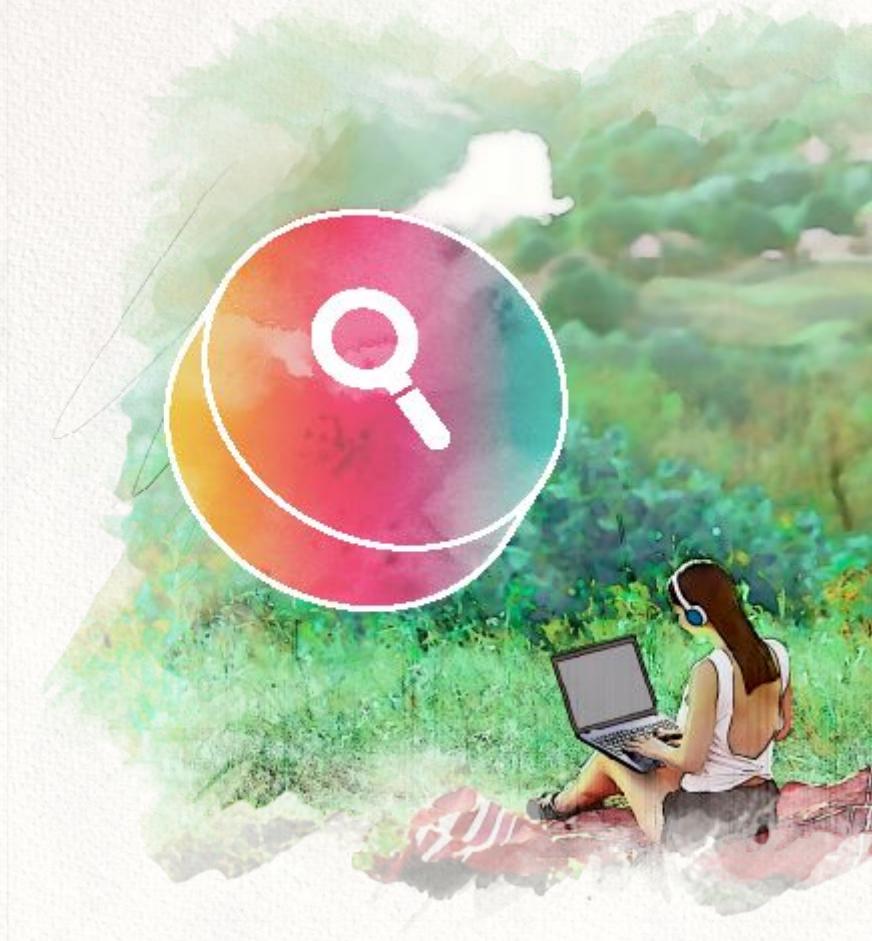

OURVERSE SEARCH

# FIND AND DISCOVER

---

-  
Anyone can search any website, information and location and learn about the world and its locations, culture and population

-  
The higher points received by the value based rating system, the higher the results for a certain project or location in the search tool

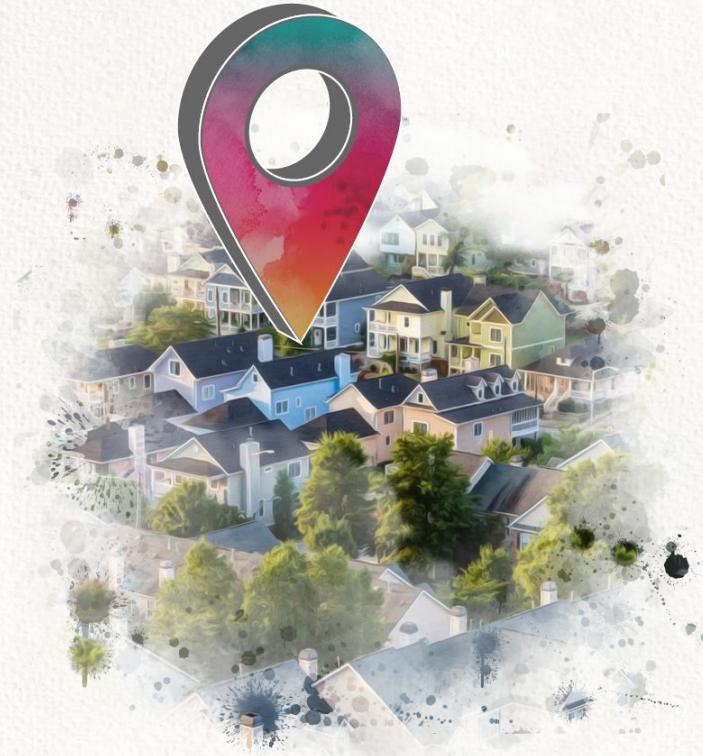

OURVERSE MAPS

# A CO-OWNED WORLD MAP

---

The decentralized alternative  
to Google and Apple Maps

With many more interactive features for everyone

OURVERSE LIBRARY

# INDEXING THE ENTIRE WEB

---

Import or create content for Ourverse

Petabytes of information will be available  
to Internet 2.0 users

OURVERSE COMMERCE

# ENABLING BUSINESSES

Any type of business can add their premises and link their websites and information with ease

Any individual or business can showcase and sell their products and services in Ourverse

Super easy to use ordering and payment system integrated

OURVERSE EXPLORER

# VIRTUAL REALITY MODEL OF OUR WORLD

---

Ourverse is on a journey to recreate our actual world in a 2D and 3D as authentic and developer/user-friendly as possible

This is only achievable by allowing everyone and anyone to participate in the creation of this new digital realm

OURVERSE EXPLORER

# VISIT ANYWHERE AND ANYONE

---

-  
Any person can now visit the entire world  
without actually travelling there

-  
Meet new people and  
make new friends in any location

# OUR METAVERSE EXPLORER

Showcased here is a an example  
of the rendered house in  
our Metaverse.

UNDER DEVELOPMENT

EXPERIENCE  
**FREEFLOW ACADEMY**

Educational tools

Augmented & Virtual Reality  
MetaVerse

# LIVING WITH INCLUSION

Everyone can share and access any information and digital content.

Everyone can now directly buy and sell from one another.

Wealth increases because of money staying in the country. Equal chances for everyone

## MONEY STAYS IN COUNTRY

The government can provide its own services and capabilities to its citizens without any limits.

This method assures the government that money will stay within the country and add to the GDP.

This has a potential of earning and saving tens of billions of dollars.

## DATA STAYS IN COUNTRY

Data is now the world's most important asset.

You can make sure that the country's data is kept safe on a private and distributed network located within the country.

# INSPIRE

## **SIGNIFICANTLY LOWER CARBON FOOTPRINT**

Internet 2.0 reduces carbon footprint by using almost ten times less energy while promising substantial economic pay-offs and allows them to build a green economy, greatly reduce energy use and greenhouse gas emissions, and spur economic growth by creating new environmental jobs

## **DIGITAL GOVERNMENT SERVICES**

Internet 2.0 allows citizens to participate in civic life more fully and interact with government agencies with greater ease. E-Government solutions can make navigating government services more efficient, improve the quality of services, and increase transparency. With civic participation only a click away, this can lower the barrier between citizens and their elected representatives

# **INSPIRE**

**INSPIRE**

## **WOMEN EMPOWERMENT**

With more women being connected to your Internet 2.0, endless opportunities present themselves to your female population. This allows them to equally participate in the economy and attain access to information to become more self-sufficient and independent leaders.

## **RURAL COMMUNITIES**

Your Internet 2.0 breaks down the barriers of distance and time, allowing residents of rural areas to participate in economic and civic life far beyond their geographic region. Communications made possible by this technology eliminates the logistical constraints of regionally-based business models, allowing businesses in isolated areas to compete with their big-city counterparts.

## ECONOMIC GROWTH THROUGH YOUTH

Expanded access to Internet 2.0 generates major economic growth and rapid job creation. Higher speed connections accelerate business development by providing new opportunities for innovation, expansion, and e-commerce. Connected communities create wealth and opportunity by attracting businesses to their localities.

## EDUCATION

Your New Internet enhances every level of education. Advances in information and communications technology means that education is no longer confined to the classroom. Customized educational tools allow for remote collaboration among fellow students on projects, videoconferences with teachers and real-time video exploration of faraway areas. It helps students in preparing to enter the 21st Century workforce.

## INSPIRE

## SOVEREIGNTY STAYS SAFE

With data being stored safely and locally, You dont have to worry about international servers being hacked, and does not have to worry about its citizens being exploited for profit by international companies.

## EXTERNAL INFLUENCES UNDER CONTROL

No parties outside the country can influence the minds of its citizens to behave and act irrationally by being vulnerable to fake news.

'The best amongst you are  
those that bring the greatest  
benefits to many others.'

-Hadith
